

Smart Retail Solution

Sensor networks for better store operations and experiences

SOLUTION BRIEF

Measure store traffic, track operations & improve experiences using your existing network infrastructure

Temperature & Air Quality Sensors

Placed in different zones to monitor conditions for food safety and customer comfort

Badges and Tags

Monitor staff and asset location by zone

People Counters

3D camera provides accurate counts of individual customers, traffic flow, and zone occupancy

Energy Monitoring

See equipment activity using current sensors

Door sensors

Magnetic sensor alerts staff if door is open too long or area needs securing

Cradlepoint Routers with Rigado Edge Connect

Bluetooth-enabled E300, E3000, & R1900

Real-Time Alerts & Reports

Ensure consistency across locations and provide insights to improve operations, safety and customer experience

Displays and Alert Buttons

Status displays and buttons allow customers to request service and see status on product stock

Deliver Real-Time Data

to automate store operations and improve efficiency

Monitor and Manage

customer traffic, store comfort and cleaning, valuable assets, and product stock issues

Extend to New Use Cases

with additional sensor types, custom displays, and employee wearable devices

Why Deploy Rigado Sensor Networks on Cradlepoint?

70%
Deployment Savings

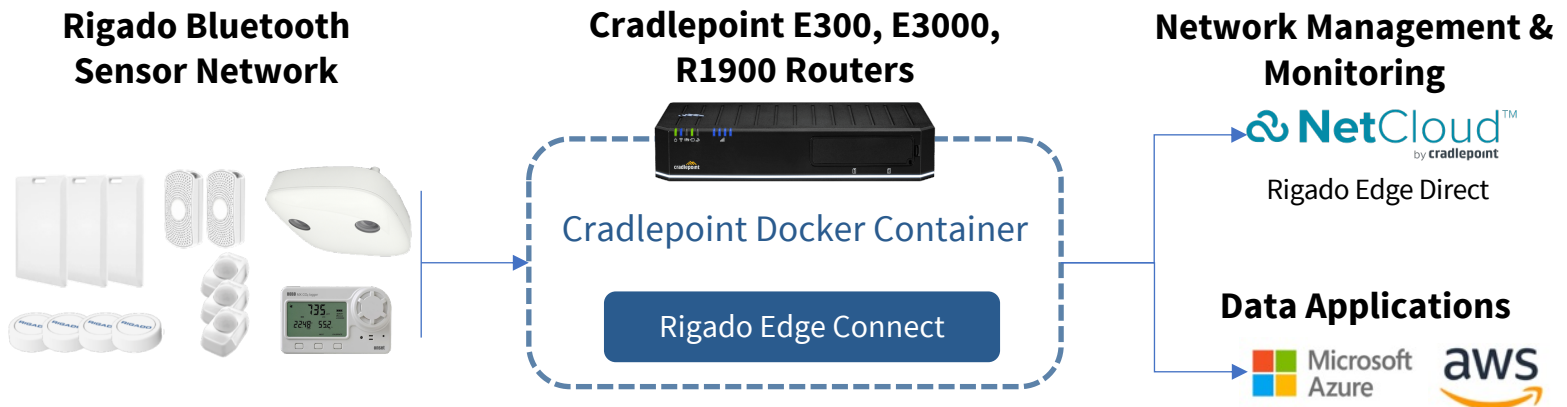

3X
Speed to Market

30%
Lower Upfront HW Cost

compared to typical IoT gateway deployments

Rigado Runs on Cradlepoint

No more **shadow IoT networks**. With Rigado Edge Connect, any Cradlepoint network can collect, filter, and process sensor data directly to cloud endpoints.

- Use pre-integrated devices or **connect your own custom sensor**
- No additional gateways required
- Subscription includes Rigado monitoring & support

Pre-Integrated with Leading Cloud Providers

Rigado Edge Connect delivers “app & dashboard ready” data to any cloud destination:

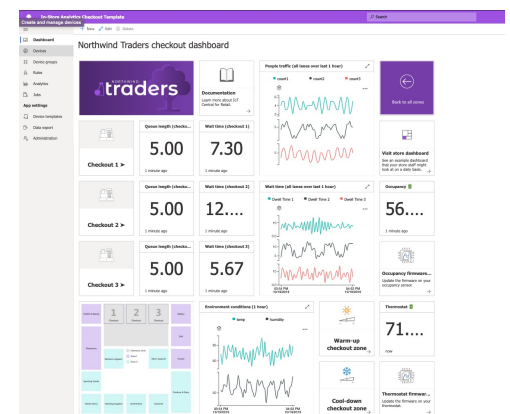

- Azure certified plug and play with Hub and IoT Central.
- AWS advanced technology partner with Retail, IoT, and Travel & Hospitality Competencies

**Azure
Certified
Device**

Azure IoT Central Retail Dashboard

“Rigado and Cradlepoint have built an innovative solution on Azure IoT Central’s secure and scalable foundation to provide spatial insights and connectivity for smart buildings.”

-Bert Van Hoof, Partner & Group Program Manager, Microsoft Azure IoT
