

A PARTNERSHIP BUILT FOR SMART ENVIRONMENTS

Accelerate your Commercial Smart Space initiative by leveraging a Rigado + Losant sensor-to-dashboard IoT edge solution

SMART OFFICE / HOT DESKING • SMART CAMPUS • CONNECTED STADIUM & VENUE

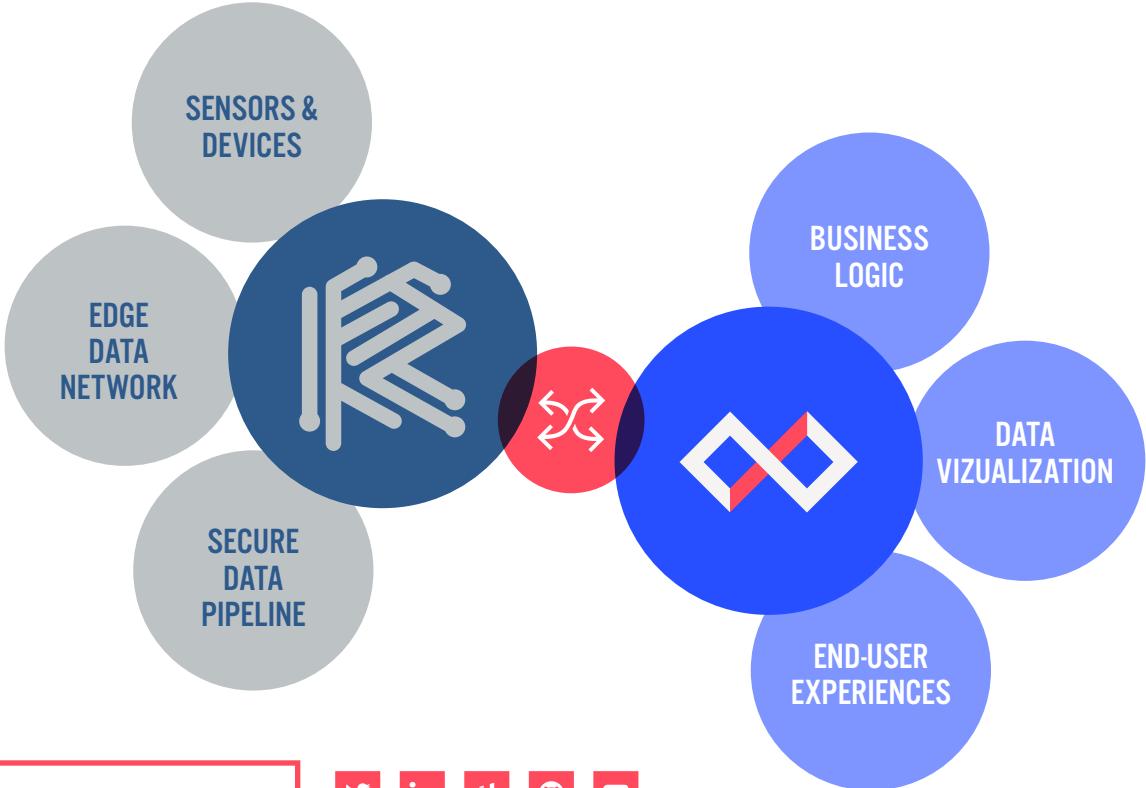

RIGADO

Rigado makes capturing real-time physical and environmental data easy by combining all of the elements required for IoT project and product teams to deploy and manage wireless Commercial IoT solutions at scale: Secure edge connectivity and computing, a containerized application platform, a variety of wireless connectivity options, pre-integrated sensors and devices, and ongoing support services – in a simple annual subscription.

LOSANT IoT PLATFORM

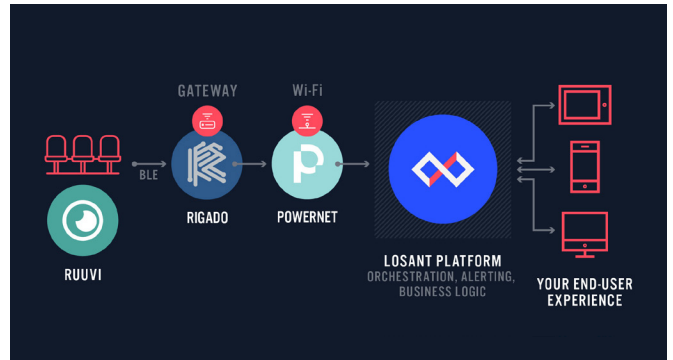

The Losant Enterprise IoT Platform is an application enablement platform which allows enterprises to effectively build applications that securely scale to millions of devices. With real-time stream processing and batch processing capabilities, users can use the Losant platform to create dynamic experiences and perform complex analytics. All of Losant's components, from Edge Compute to End-User Experiences, work seamlessly together to transform data into tailored IoT solutions.

SMART SPACE SENSOR-TO-DASHBOARD SOLUTION

EDGE CONNECT

Configurable data pipeline for aggregating, filtering and formatting data from wireless devices

EDGE DIRECT

Set of cloud-based tools that make it easy for teams to deploy, update and administer gateways in the field

SENSORS & DEVICES

Connect easily and securely to a wide range of sensors and devices using Bluetooth 5, Wi-Fi, and Mesh

VISUAL WORKFLOW ENGINE

Fundamental platform component that helps quickly implement business logic and provides a unified development tool

EDGE COMPUTE

Bridges the gap between local and cloud environments by allowing workflows to run directly on gateways

END-USER EXPERIENCES

Fully integrated functionality that provides the tools to build custom and branded user interfaces and APIs

ABOUT RIGADO

Rigado provides secure and reliable large-scale, low-power wireless network infrastructure for over 300 global partners, with over 6 million Bluetooth devices deployed. Founded in 2010, Rigado is headquartered in Portland, Oregon with offices in London, UK and Shenzhen, China.
