

RIGADO

We Power Unified IoT Networks for Retail Enterprises

Create a shared network and connect ANY IoT device

- Unified IoT Networks reduce cost by 70% and deploy 3x faster
- Shared architecture improves manageability and vendor flexibility

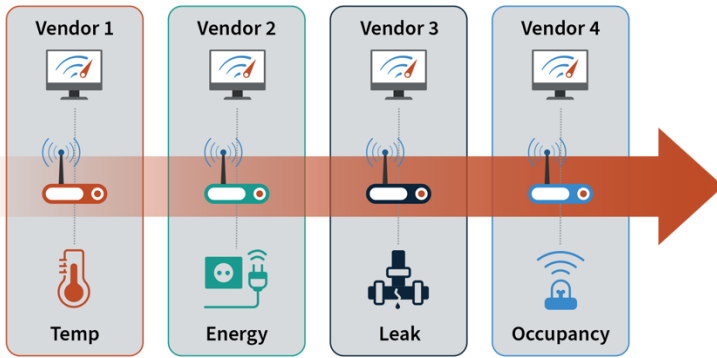

Retailers innovate faster with Rigado

- Locate **lost inventory** with real-time asset tracking
- Reduce spoilage** with per-item temp monitoring
- Seamlessly handoff** to telematics fleet from stores & warehouses for continuous data collection

- Deploy **electronic shelf labels** at scale using the same network
- Retain **consistency** across multiple WiFi AP, ESL, and sensor device vendors

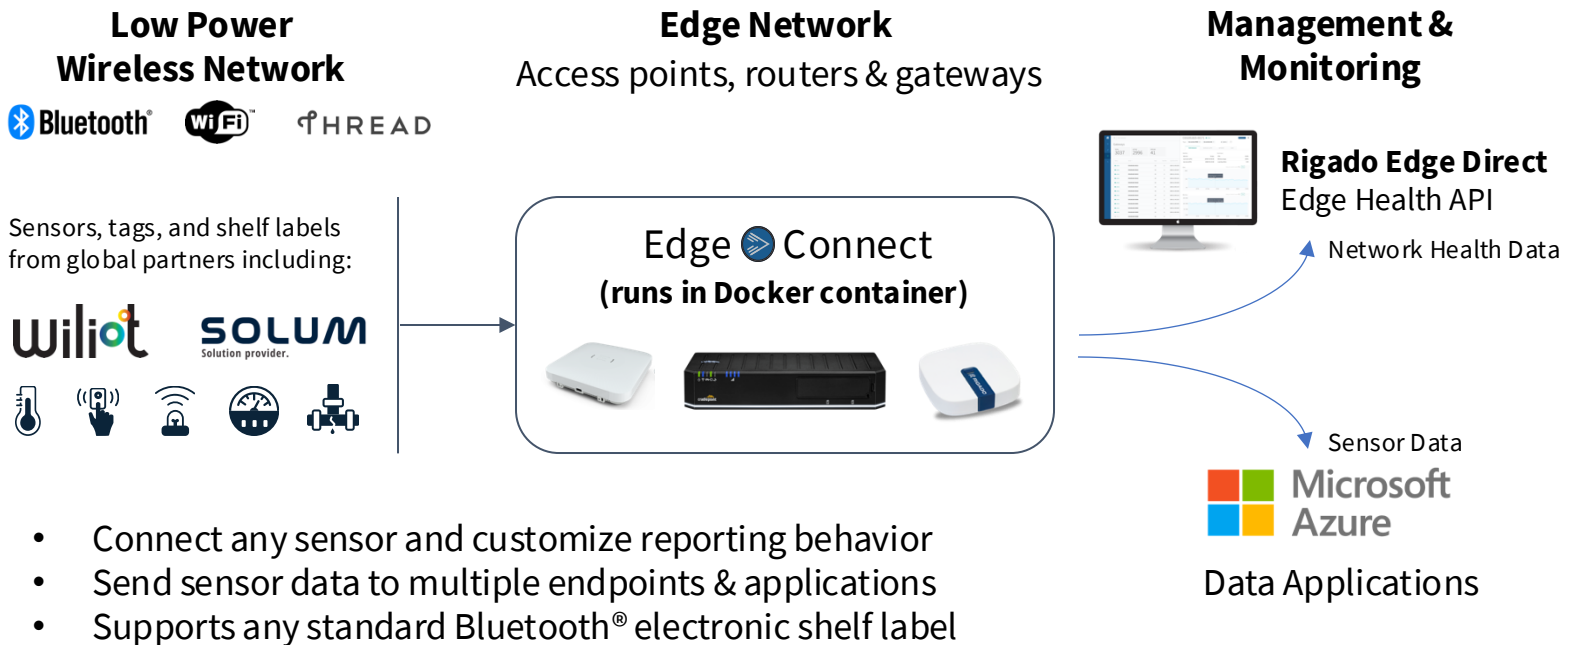

Avoid deploying dedicated gateways and apps for every use case

This approach results in:

- ✗ Reduced ROI and increased SaaS fees
- ✗ Redundant networks
- ✗ Security gaps & inconsistent data
- ✗ More management overhead

We send data directly to your dashboard, workflow or application

Rigado Edge Connect runs on market leading WiFi access points, routers, and mobile IoT gateways including:

Rigado will accelerate your retail IoT transformation with a unified network that scales
